proxysettings.html

[ORIGINAL] Proxy Configuration

This is how you configure the Wi-Fi proxy for Adblock Plus:

- Open **wireless settings**
- **Touch and hold the connected network** until the context menu appears
- Select **Modify network**
- Check **Show advanced options**
- Look for **Proxy settings** below and set it to **Manual**
- Set Proxy to **localhost** and Port to **2020**

There are [detailed instructions](http://adblockplus.org) on adblockplus.org.

[SUGGESTED] **Proxy Configuration**

How to configure the Wi-Fi proxy for Adblock Plus:

1. Open **Wi-Fi settings**
2. **Touch and hold** your connected network
3. Select **Modify network**
4. Check **Show advanced options**
5. Set **Proxy** to **Manual**
6. Set **Proxy hostname** to **localhost** and **Proxy port** to **2020**
7. Touch **Save** and you're done!

Still having problems? Check out the [detailed instructions](#).

Crash occurred (Adblock Plus crashed)

Configuration information

Proxy configuration

Adblock Plus has been installed

Acceptable Ads in Adblock Plus

Ads are blocked on WiFi connection (Ads are blocked on this Wi-Fi connection)

Allowing ads on WiFi connection (Ads are allowed on this Wi-Fi connection)

Ads are blocked on all connections

Waiting for traffic on port %d

You probably need to adjust configuration (Please check the configuration)

It seems that the application encountered a problem and was forcefully stopped on previous launch. You can help us fix this if you send us error report by clicking 'OK'. (It seems that Adblock Plus encountered a problem. You can help us to fix this by sending us an error report by clicking "OK")

You might add your comments about the problem below:(Please add your comments about the problem below (optional):)

Failed to submit crash report, will try again later. (Failed to submit the crash report. Adblock Plus will try to submit this later.)

A subscription has been selected based on your language: '%s'. <a>Acceptable Ads have been enabled. You can change this in the settings. (A blocking list has been selected based on your language: '%s'. <a>Acceptable Ads have been enabled. You can change this in the settings) Adblock Plus now supports <a>Acceptable Ads, and has automatically enabled them. You can disable them in the settings.

It seems that no traffic is passing through application. (It seems that no traffic is passing through the Adblock Plus.)

Adblock Plus can not change the proxy settings on your device, please configure it manually. (You need to configure the proxy settings manually. Unfortunately, this cannot be done automatically.)

Bad port value

New update available (Update available)

You are running the latest version

New update is available for download. Proceed? (An update for Adblock Plus is available. Download?)

Downloading update: %d%%

Ready to install update

Failed to check for updates, will try again later (Failed to check for updates. Please try again later.)

Please note: The best we can do is make the icon invisible. If we remove the icon, Android could stop Adblock Plus any time, which will result in loss of connectivity.

You can completely disable notification icon through Android settings. For this uncheck <i>Show notifications</i> check box in <i>Application info</i>. Press <i>Show me</i> to open it now. (Please note: The best we can do is make the icon invisible. If we remove the icon, Android could stop Adblock Plus any time, which will result in loss of connectivity.)
